Initiate a batch order from search results

- A batch option has been added to the action bar in search results
- This feature copies all selected properties in search results and places them in the batch order screen in Order Portal
- This allows you to order any property data report via batch from search results

SEARCH RESULTS			x Clear Search	
, CA		State Of California	Multi	Labels

Advanced Search Enhancements

- A new filter has been added for postal carrier route
- A "+" option was added to the Neighborhood Code filter, enabling entry of multiple neighborhood codes
- The Corporate Owned filter in Advanced Search has been enhanced to target only corporate owned in addition to excluding corporate owned properties
- A Seller Carry-back Option was added in the Mortgage Type filter in Advanced Search

Order Portal Enhancements

- The *County As of Date* and report *Run Date* has been added to the batch output file
- An option at the account level was added to include the report Disclaimer to each individual report in a batch
- Field pre-validation was added to batch upload

Other General Enhancements

- The PDF file size of Sales Comparables and Neighbors Reports has been reduced
- The billing of the Foreclosure Export Add-on has been corrected, it will bill only for records with foreclosure data present
- Centroid Latitude & Longitude was added to Property Characteristics and Property Detail Export packages
- The main application report header has now been locked and will no longer hide when scrolling down the page
- The FlexSearch link logic from subject property tab was improved to provide more accurate, relevant results
- The True Legal & Vesting report was moved from *Property Ownership (O&E)* category to *Property Data Reports* in the main order panel and batch order tab in Order Portal
- Single-click searching was added for properties from the Order History area of the Customer Contact screen
- The maximum number of saved farms was raised per customer from 500 to 1000
