MO - Jefferson Back Plant – 50	7

Overview:

This document will cover plant information applicable to Jefferson County Missouri. For information on DTS2, please see the services guides on the DataTrace University home page.

The recommended desktop configurations for the Data Trace customers running our search system and the Arb Map website are included in the documentation folder on the Data Trace – Customer Web website and the documentation folder on the Arb Map website.

Data Trace - Customer Web <http://download.edatatrace.com/accesscustomer>

Arb Map website: <http://arbs.edatatrace.com>

For DTS2 guides and eLearning content: <http://www.datatracetitle.com/data-trace-university>

BEST PRACTICE: Remember, when working with DTS2, always work with DataTree and the ARB map website as well. Batch imaging in the Data Trace Search System is a great tool for requesting multiple documents with no range.

DataTree for the Desktop (DTD):

When using DTD to search and order images, note that the application will display the date and document number range available to the application.

The screenshot shows the 'DataTree for the Desktop - Order Entry' window. At the top, there are fields for 'Order Name' (value: 1) and 'Comment'. Below that, 'State' is set to 'MO' and 'County' to 'Jefferson'. The 'Type' dropdown is set to 'Document - Year.DocID'. The 'Document Information' section shows a range from '2002.1 (01/02/02) to 2013.21066 (05/24/13)'. There are also fields for 'Year', 'DocID', and 'Through'. The 'Printing Information' section includes checkboxes for 'Auto Print', '11x17', and 'All Pages', along with a 'Page Limit' of 20. At the bottom, there is a table with columns: '#', 'Status', 'State', 'County', 'Doc Type', 'Description', and 'Page C'. The table is currently empty.
