

TaxSource™ Property Tax Reporting Made Easy

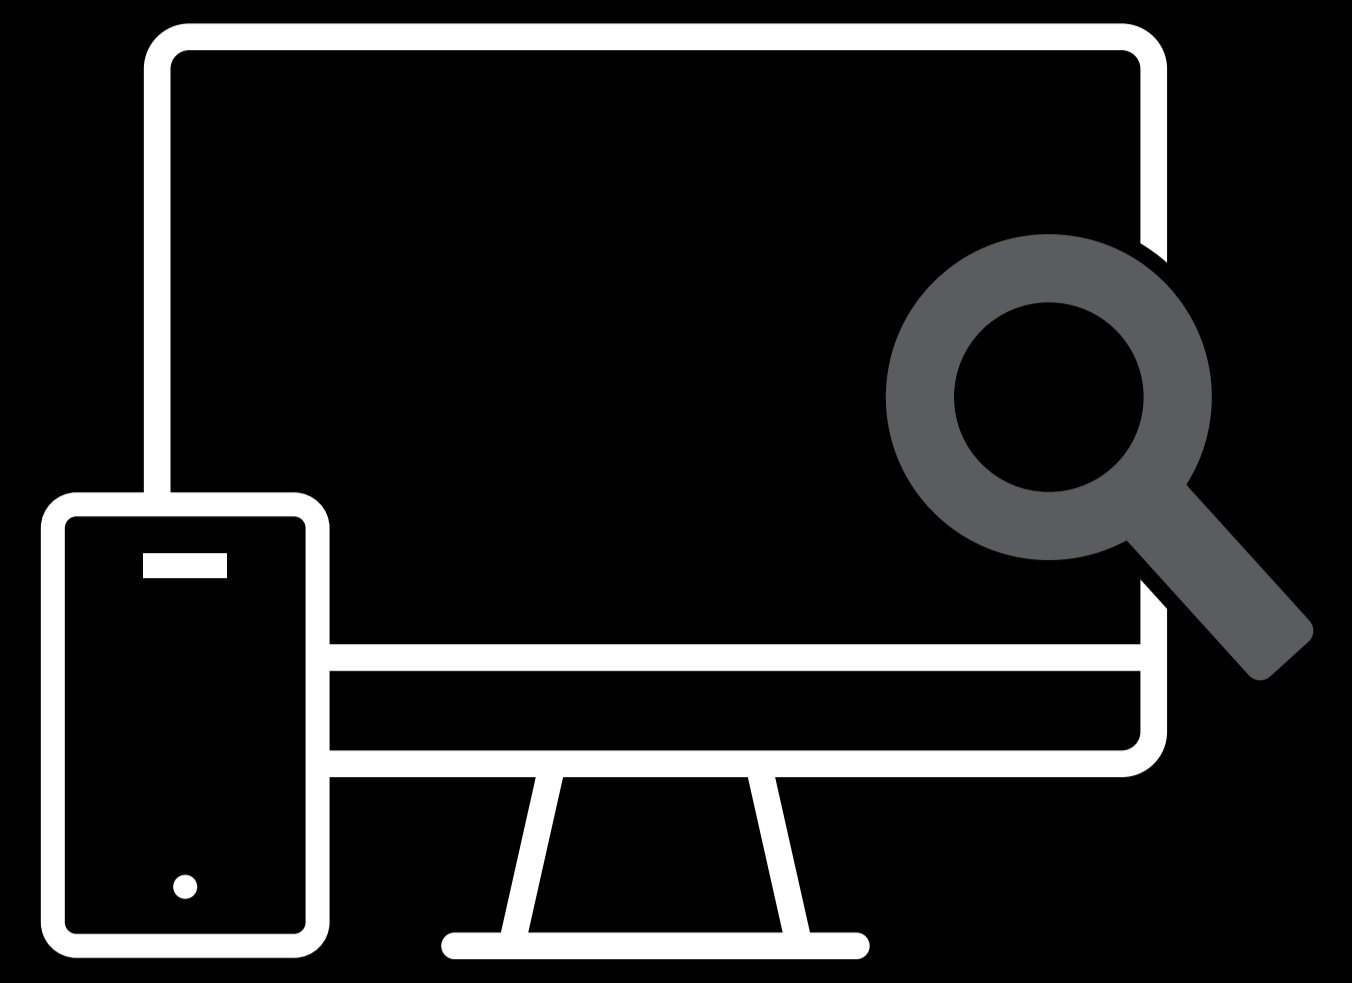

Managing efficient, reliable tax reporting information is challenging, time consuming and costly.

Multiple Data Formats
Obtaining tax data from websites and multiple vendors creates extra analysis to interpret data results

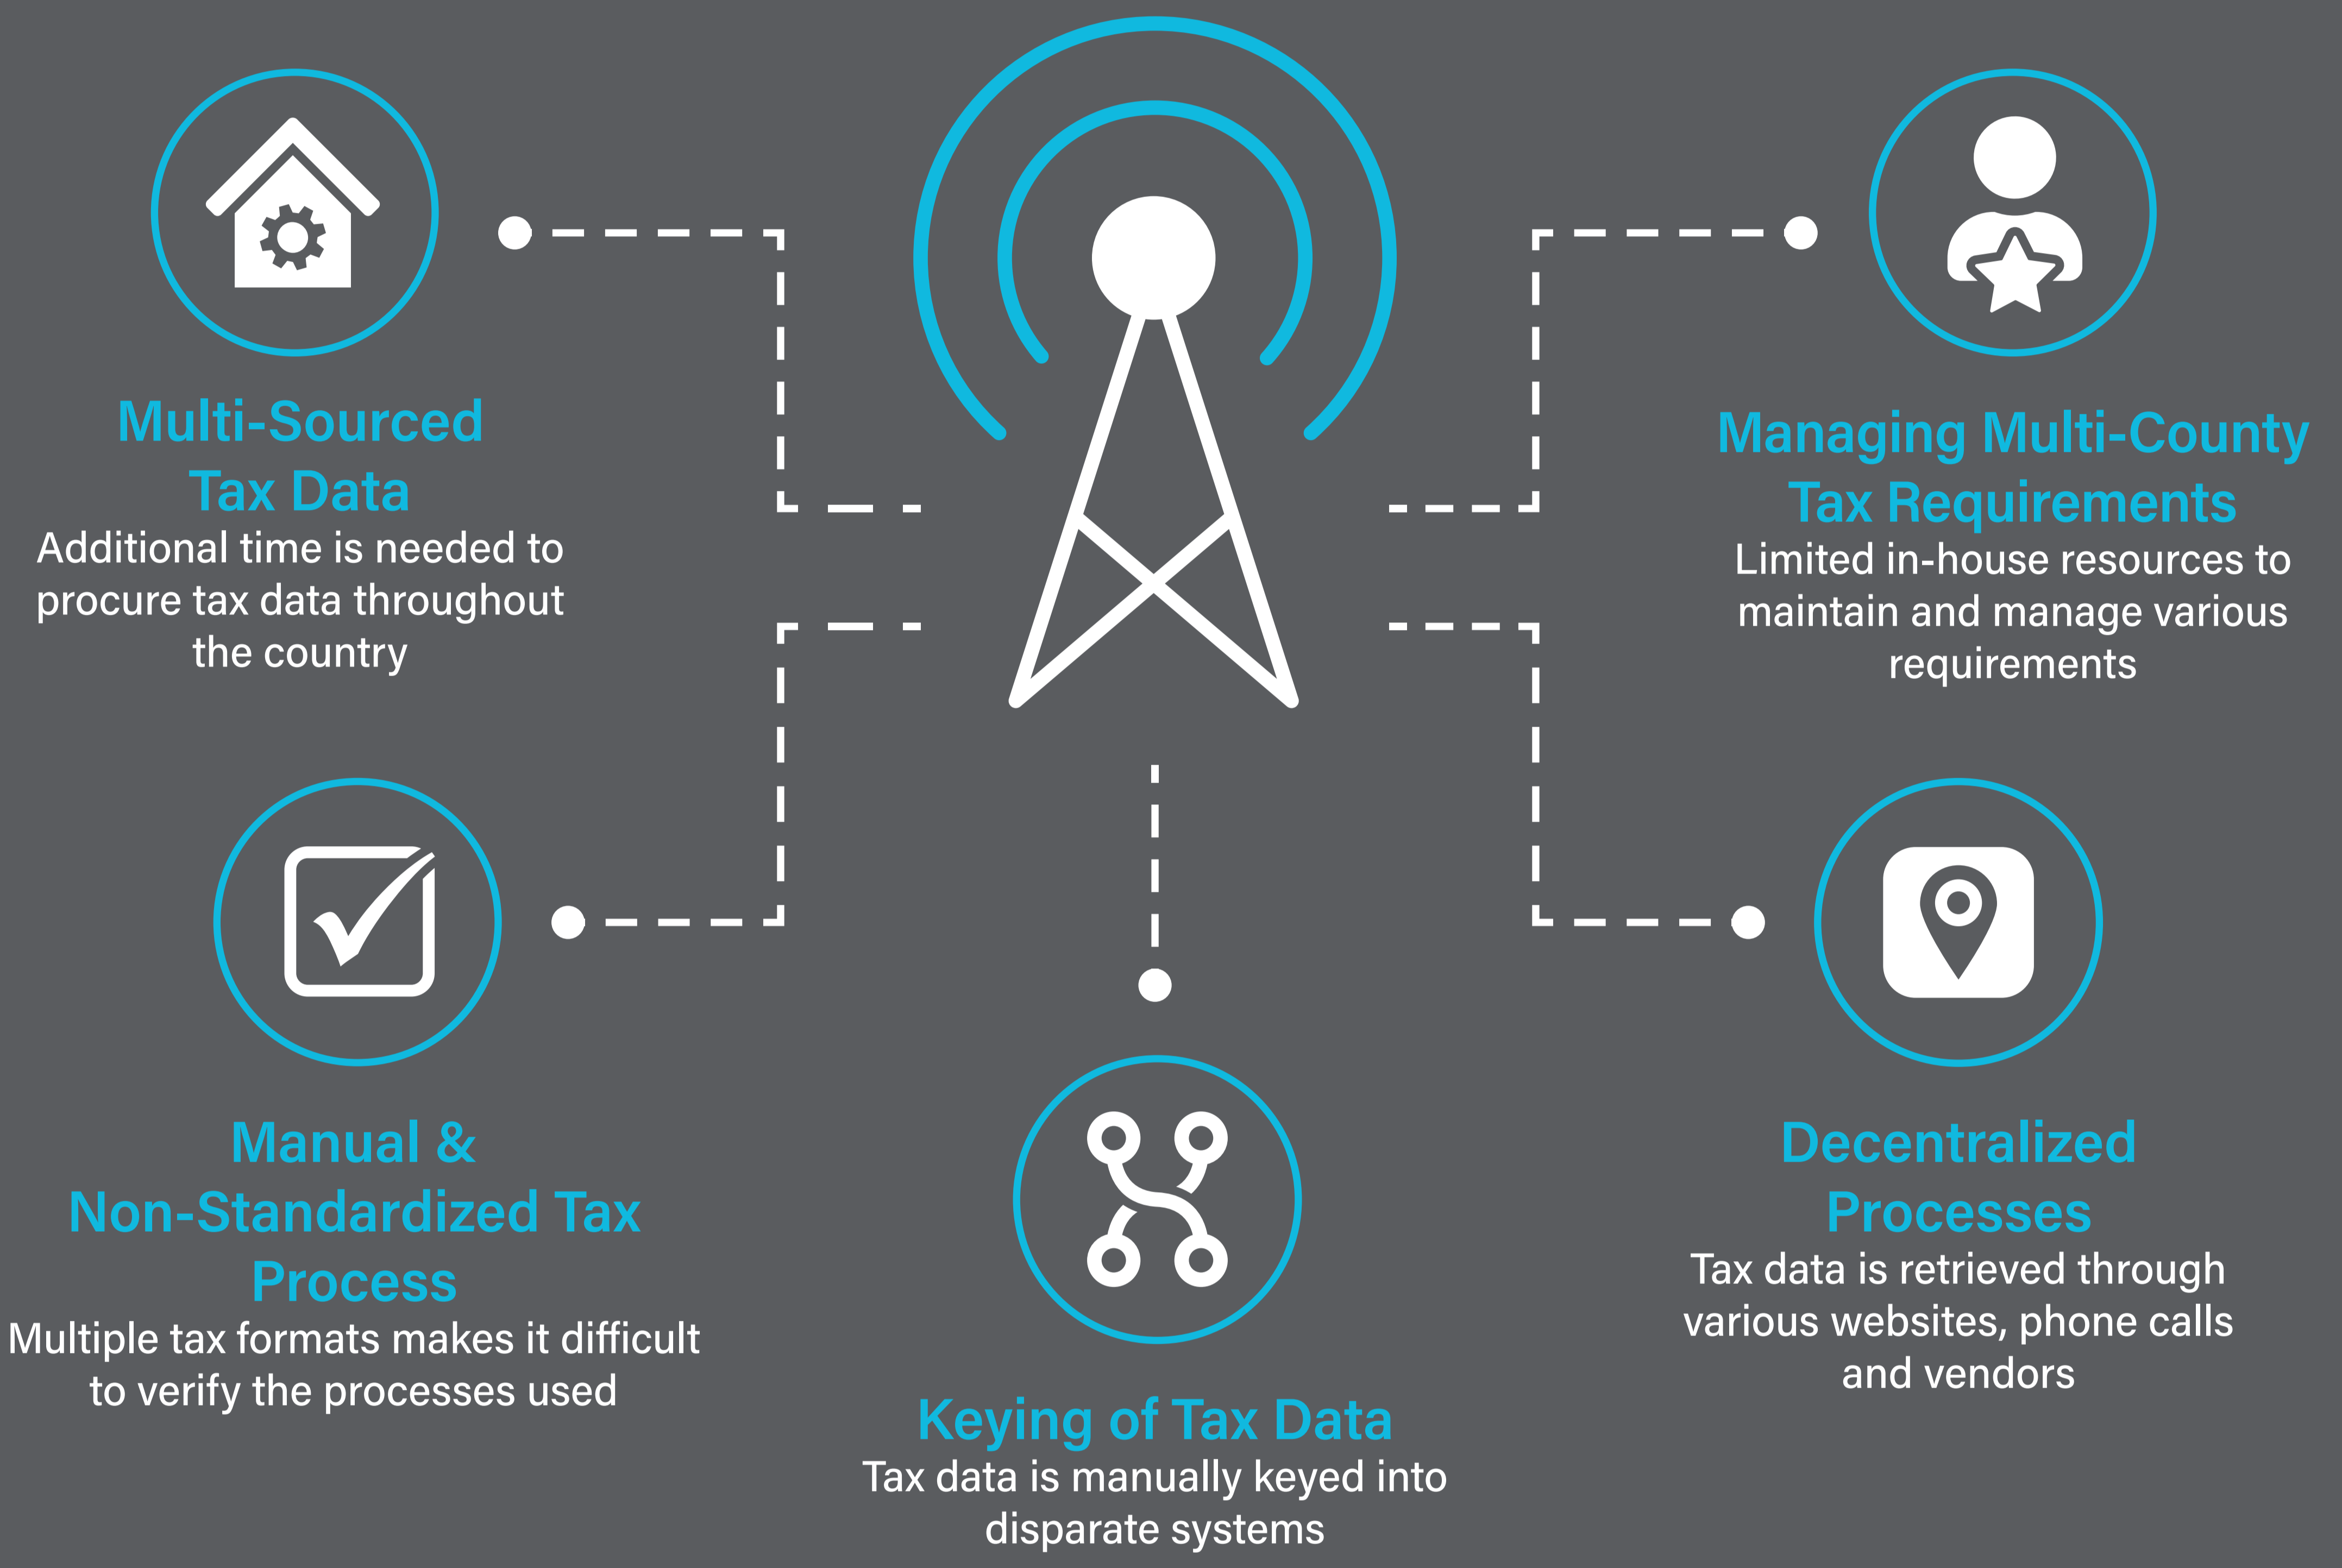

Varied County Requirements
National production demands require specific regional expertise

Manual Tax Searches & Processing
Researching tax websites or making calls to tax collector offices are both time consuming and costly

Simplify Your Process

Title companies routinely manage tax reporting through multiple county websites and manual efforts to key data into multiple systems. Even when using regional providers, the data formats are often inconsistent and lack integration to title production systems.

Introducing DataTrace TaxSource™

TaxSource property tax reporting delivers full national coverage with the most current tax status and rapid results through the latest technology and data resources.

TaxSource Difference

Trust DataTrace TaxSource for all your tax reporting needs
