

# Streamline Your Production Processes

Increase efficiency, productivity and value

## Build efficiency and reduce turn times

TitleQ Streamline screens and analyzes the order up front allowing you to route to your most efficient workflows and resources resulting in improved bottom line performance.

## Win new or grow existing strategic refinance business

TitleQ Streamline provides title companies a unique opportunity to provide a highly targetable, differentiated capability in building deeper relationships with key, strategic refinance partners.

# TitleIQ™ STREAMLINE

by DataTrace

## Screen and route refinance orders to their most efficient production workflows

TitleQ Streamline uses proprietary technology with DataTrace's industry-leading title plants, quickly analyzing events impacting the subject property since the previous transaction.

Going back to seven years, TitleQ Streamline reviews the property index, the general index and the grantor/grantee index to return one of three categorized workflow outcomes. OFAC sanctions list, bankruptcy and tax agencies searches are also available.
