

DataTree for the Desktop

By Data Trace

INSTANT ACCESS TO THE NATION'S LARGEST DATABASE OF RECORDED DOCUMENT IMAGES

DataTree for the Desktop (DTD) is a robust software application that combines high-speed document retrieval with superior electronic file management and workflow productivity tools.

Search by Document ID to instantly obtain the public land records you need, either in batches of documents or one by one, including deeds, mortgages, assignments, maps, liens and more. DataTree for the Desktop gives you tools to work the way you want to work. You can view, email, fax, share, or print the images directly from your desktop. You can do everything with a digital document that you can with a hard copy, except spend hours tracking it down.

Connect to DTD via the Internet either through dial-up or cable modem, through a company Intranet, or directly via a dedicated high-speed line. And with DTD's integrated tutorial and free training, you won't have to spend hours learning how to use the software. In just minutes, you'll be adding hours or even days of productivity to your work week.

Document Images

- Deeds
- Mortgages
- Assignments
- Foreclosures
- Maps
- Judgments
- Liens
- Other county records

DIGITAL LAND RECORD DOCUMENTS

DataTree for the Desktop brings you instant access to a nationwide database of over 5.5 billion current and historical public land records. Our technology gives you a competitive edge, putting the document you want on your desktop in mere seconds.

With DTD's state-of-the-art imaging systems and database management services, property documents have never been so searchable, so accessible, and so easy to use.

THE DATATREE FOR THE DESKTOP ADVANTAGE

- Boost productivity and efficiency with batch document orders
- Quickly order and retrieve records from the nation's largest database of public land records
- Gain picture-perfect image clarity through TIF images
- Benefit from continuous image updates to the database; more than 2.5 million documents are scanned, indexed and posted each month
- View, save, share and print document images
- Search by Document ID/Instrument number
- Easy to learn document search
- Access onsite and web training for groups or individuals
- Product updates are "pushed" electronically and automatically installed on your desktop

COMPREHENSIVE COVERAGE

Available in every major metropolitan area across the nation, DataTree for the Desktop continuously expands its coverage by regularly adding new counties and document types in response to customer demand. Updated daily, DataTree for Desktop offers the most comprehensive public land record database available today. Please visit our web site at www.datatracetitle.com for the latest available coverage.
