

ONBOARDING CUSTOMERS IN TITLEFLEX

Rev. 201704

This Sales Guide will focus on the required steps to bring a new customer online in TitleFlex along with the typical provisioning defaults from a Sales perspective.

The DataTree administration tool manages provisioning in TitleFlex. Consequently, the provisioning screens will show “New DataTree” and “Classic DataTree”. You are only concerned with the sections for “New DataTree” as these are the provisioning features for TitleFlex.

Creating New Accounts

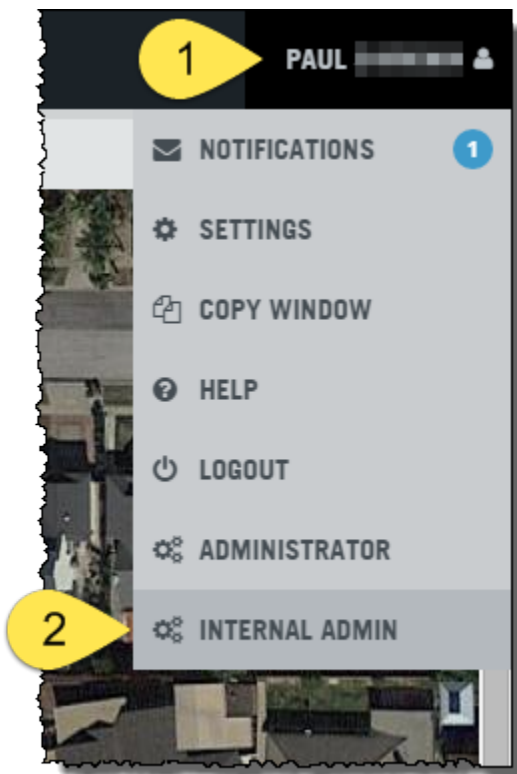

The **Internal Admin** includes the ability to create an electronic EULA, provision companies and the client administrator, create trials, and (for sales approvers) approve custom pricing.

Overview

The process for provisioning a client on the new DataTree.com can be broken into five general steps:

1. Enabling platform access
2. Enabling report access and pricing
3. Entering the client's company information and your information
4. Securing custom pricing approval (only required for custom pricing from step two)
5. Client accesses platform

To access the Internal Admin features, log into the new DataTree.com, click the Profile menu (1) and then click Internal Admin (2).

Enabling Platform and Search Access.

Click the Create Customer button to begin the process.

NOTE: The provisioning screens will reference “New DataTree” and “Classic DataTree”. Please use the “New DataTree” options.

Geographic Access

Leave Nationwide selected, as shown, as the platform is designed to search at a nationwide level.

NOTE:

The following screenshots will show the typical or recommended setup. Click on the red x or green check mark to enable or disable an option to enable or disable an option for a customer.

Authorized Services

Enable the following feature as shown in the screenshot by clicking the red x to change it to a green checkmark:

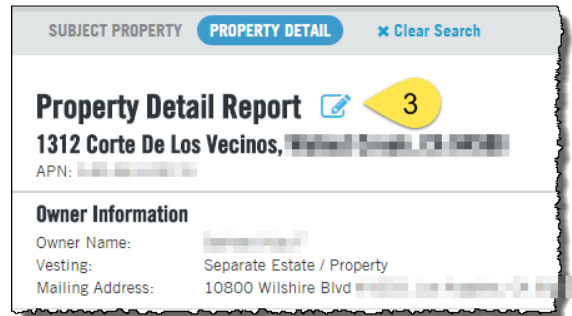

1. In the New DataTree drop down list, change the entry from DataTree to TitleFlex.
2. CRM: Enabled. Basic contact management functionality for Title Customers in TitleFlex.
3. One-Time Editing: Enabled. This will allow non-permanent changes to the Property Detail Report for printing purposes only.
4. Property Detail Auto Load: Disabled. This feature automatically loads the Property Detail Report when a property is selected which will charge the customer. Leave this off (red x).
5. Batch Ordering: Disabled unless requested by the customer.

CRM activates the Customer feature (1). Batch Ordering activates the Order Portal (2).

One-Time Editing provides the edit option (3). Changes made are for printing purposes only and do not permanently affect the data.

Interface Access

Leave as Web Interface so that the customer can access TitleFlex through a browser.

Pricing

The pricing is broken into two parts: The Monthly Pricing Plan and feature access and their prices.

Monthly Pricing Plan:

Leave Monthly selected. No prepaid plans are available for new customers.

<input checked="" type="radio"/> Monthly	<input type="radio"/> Prepaid	Monthly Minimum Commitment(12 Mo.)	<input type="radio"/> Custom	<input type="radio"/> Plan 1	<input type="radio"/> Plan 2	<input type="radio"/> Plan 3	<input type="radio"/> Plan 4	<input type="radio"/> Plan 5
				\$99.00	\$200.00	\$500.00	\$750.00	\$1000.00

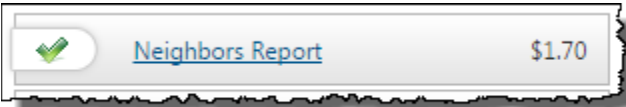

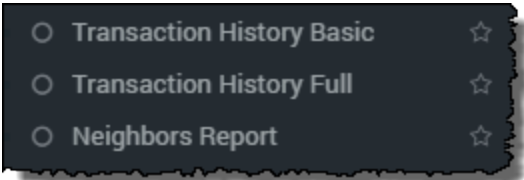

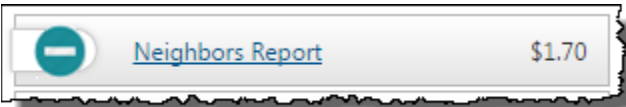

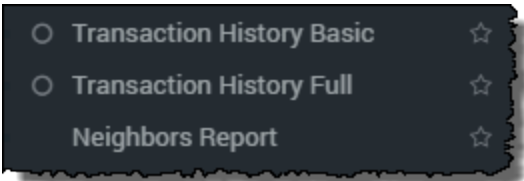

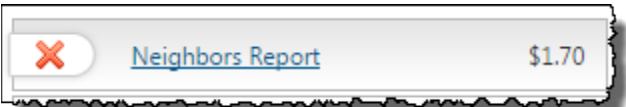

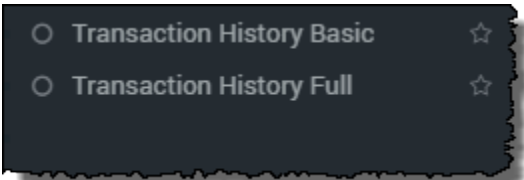

Next, select a monthly commitment (Custom or plans one through five) in the radio buttons at right.

NOTE: Selecting the Custom plan will allow you to setup a unique monthly minimum amount and specific report pricing. Do not select the Custom pricing radio button unless you want custom pricing for the monthly commitment and all products.

This will also trigger the system to send an email to your managed and the Finance team to approve your custom pricing. Your client will not be able to access TitleFlex until the custom pricing is approved (described later in the document).

IMPORTANT:

The following pages describe the report provisioning. The functionality allows you to control whether or not a report is orderable and visible as described in the following table:

<p>Green Checkmark</p> 	<p>Visible / Orderable.</p> 
<p>Circle with Dash</p> 	<p>Visible only.</p> 
<p>Red x</p> 	<p>Unavailable.</p> 

Features and pricing

After selecting a monthly plan, you have the option to change the pricing for an individual report. If you select Custom pricing, you must manually enter all price points.

Complete the following sections: Recorded Documents, Property Reports, Property Lists, and AVM Reports. Flood, Appraisal & Valuation, Property Ownership (O&E) and Fraud & Verification are optional and require a hard-copy contract. See the Appendix: Managed Services Products for more information.

Click the section headers in the left hand frame (e.g. Property Reports, Property Lists, AVM Reports) to switch to those sections and modify their options.

NOTE:

The screenshots show only the New DataTree (a.k.a. TitleFlex) options. If you need to change a per report price, click in the blank text box to the right of the report name and enter the custom price.

Figure One: Recorded Documents Screenshot:

The screenshot displays a web interface for managing services. On the left is a sidebar with a list of service categories: Recorded Documents, Property Reports, Property Lists, AVM Reports, GIS Layers, Flood Reports, Appraisal & Valuation, Property Ownership (O&E), and Fraud & Verification. The 'Recorded Documents' section is currently selected. At the top of the main content area, there are two tabs: 'Nova' (selected) and 'CoreLogic'. Below the tabs, the 'New DataTree' section is visible, containing a table of services with their respective prices. Each service has a green checkmark icon and a text input field for custom pricing. Below this, the 'Classic DataTree' section is partially visible.

SUBMIT

Hard copy agreement has been executed.

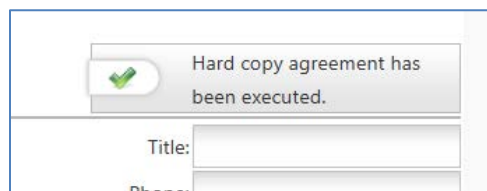

Enter the following information:

- Setup Fees: Insert 0 if there are no setup fees.
- The username will be the client's administrator account.
- All customer information.
- Business Unit: Select your unit, e.g. DBS, FAMS or Interthinx.
- Sales Rep: This is dependent upon the Business Unit selection. Your name will not appear unless you select your Business Unit.
 - NOTE: Selecting your name affects two things:
 - Commissions: Make sure your name is entered.
 - You will be cc'ed on the system correspondence to the customer so you know when the emails goes out.
- Complete the Industry, How Did They Find Us selection, and Routing selections.
- In the Billing Method select Monthly Invoice:
 - NOTE: Certain sales teams may require the credit card or prepay methods. If in doubt, check with your sales manager.
 - You may select Credit Card or Prepaid under the following circumstances:
 - Select Credit Card ONLY if the client admin has credit card authorization. At first login, the system will require the client admin to enter the company credit card to complete the setup.
 - Select Prepaid ONLY if the customer has already provided credit card authorization for a fixed amount to be credited into their account. All activity is drawn against that prepaid amount.

NOTE: By default, “Hard copy agreement has been executed” is disabled, meaning the customer is going to accept the online EULA (a click-thru). If the customer is receiving a hard copy agreement for wet signature, enable this option by clicking on the red x and changing it to a green checkmark so that they will not have to accept the online EULA.

A form snippet showing a toggle switch for "Hard copy agreement has been executed." The switch is currently disabled, indicated by a red 'X' icon. Below the toggle are input fields for "Title:" and "Phone:".

A form snippet showing the same toggle switch for "Hard copy agreement has been executed." The switch is now enabled, indicated by a green checkmark icon. The "Title:" and "Phone:" input fields are still present below.

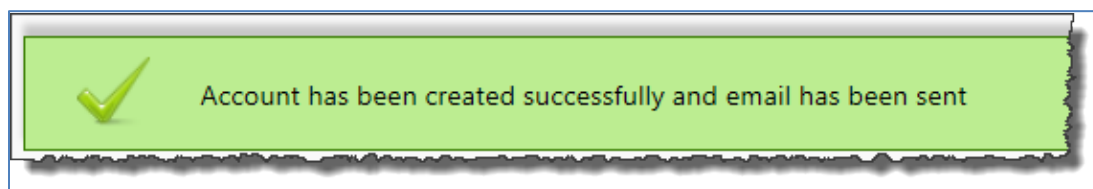

They must still accept pricing. See the Client Experience Section (following) to see how this choice affects the client administrator’s first login.

Click Submit at the bottom of the form:

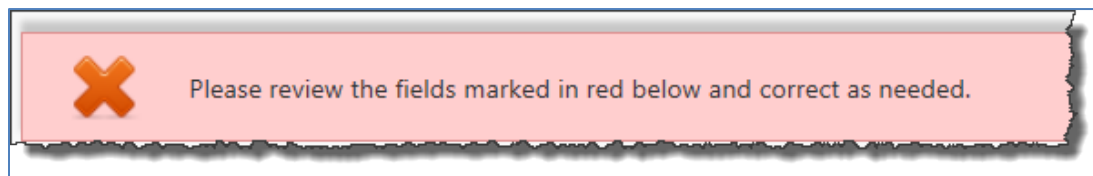

Two buttons are shown: a grey "CLEAR" button and a yellow "SUBMIT" button.

If you have correctly entered all required information, you will receive the following confirmation:

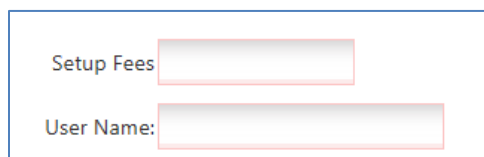

A green confirmation banner with a green checkmark icon on the left. The text reads: "Account has been created successfully and email has been sent".

If there is a missing field, you will receive the following message. Please correct the highlighted fields.

A red error banner with a red 'X' icon on the left. The text reads: "Please review the fields marked in red below and correct as needed."

Example:

A form snippet showing two input fields: "Setup Fees" and "User Name:". Both fields have a faint red border, indicating they are required or have an error.

The highlighting is a bit faint so look carefully.

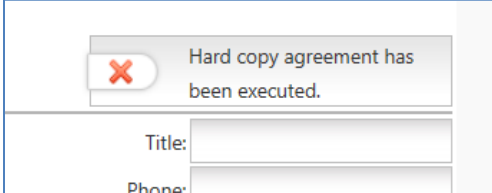

Client Accesses Platform:

The client administrator will receive two emails, one with their username (that you entered in the company information section) and one with a system-generated password. See Appendix items one and two for copies of the emails. At their first login, the client administrator will have a slightly different experience based upon the following:

Hard Copy Agreement has NOT been executed:

If this option is disabled (red x), at their first login, the client will be:

- Prompted to change their password
- Accept the EULA
- Accept pricing

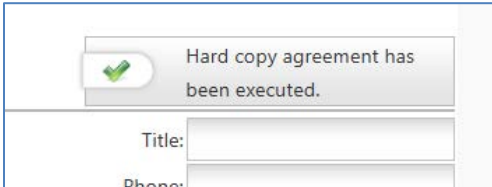

A screenshot of a login form. At the top, there is a grey box with a red 'X' icon and the text "Hard copy agreement has been executed." Below this, there are two input fields labeled "Title:" and "Phone:".

This is the default. A PDF copy of the EULA is in the Appendix at the end of this document.

Hard Copy Agreement HAS BEEN executed:

- If this option is enabled, as shown here, the client administrator will:
- Not be presented with the online EULA
- Will have to accept the pricing.

A screenshot of a login form. At the top, there is a grey box with a green checkmark icon and the text "Hard copy agreement has been executed." Below this, there are two input fields labeled "Title:" and "Phone:".

Once the client administrator has accepted the pricing (and EULA per the first option), you, your sales manager, and the customer will receive a confirmation email (along with a pdf version of the EULA per the first option).

See Appendix, Item Four for a copy of the confirmation email.

Sales Approval

NOTE: This process is only required when custom pricing has been entered.

The Sales Approval section allows the designated manager to approve custom pricing. This manager will receive an email informing them that their approval is required. See Appendix Item Five for an example of the email.

Pending Approvals

The designated approver can log in to DataTree.com directly from the email and access the Sales Approval form through the Internal Admin

After clicking Sales Approval, locate the account in question from the Pending Approvals list and click the “View Details” icon:

Pending Approvals				
Account #	Company	Name	Status	Action
2000134	Ps	Stage Prasu	Edit	 
2000138	Test			 
2000142	Test102			 
2000172	Wells Fargo	American First	Edit	 

Click on Icon to retrieve Account Details.

Do not click the “Delete Company” button unless you mean to delete the company.

Click Approve to approve the custom pricing.

Trial Generator

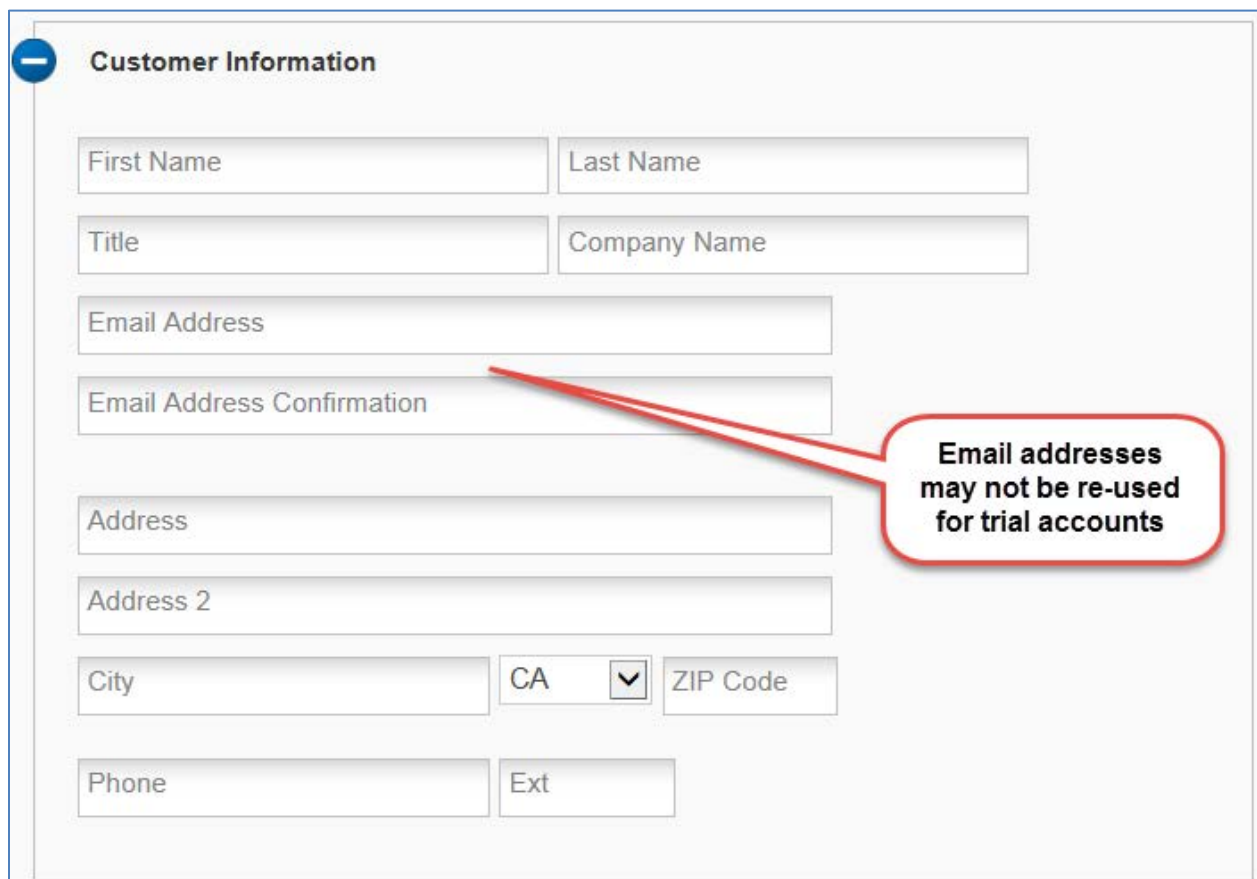

The trial generator allows limited access for 14 days to TitleFlex for potential customers to experience the platforms' capabilities.

In the Internal Admin header, click the Trial Generator.

Customer Information

Enter the customer information. Once an email address is used for a trial account, it may not be re-used to create another trial.

A form titled "Customer Information" with a minus icon in a blue circle to its left. The form contains several input fields: "First Name", "Last Name", "Title", "Company Name", "Email Address", "Email Address Confirmation", "Address", "Address 2", "City", "CA" (with a dropdown arrow), "ZIP Code", "Phone", and "Ext". A red callout bubble with a red arrow pointing to the "Email Address Confirmation" field contains the text: "Email addresses may not be re-used for trial accounts".

Trial Information

The number of trial duration, total searches, products, searches and total products to be ordered is managed here. Once submitted, a trial username will be created and emailed to the client at the email provided.

The total number of searches is fixed at 100.

Trial Information

Total Searches are successfully property retrievals where property reports or documents are ordered.
There is no limit to the number of documents retrieved from these searches

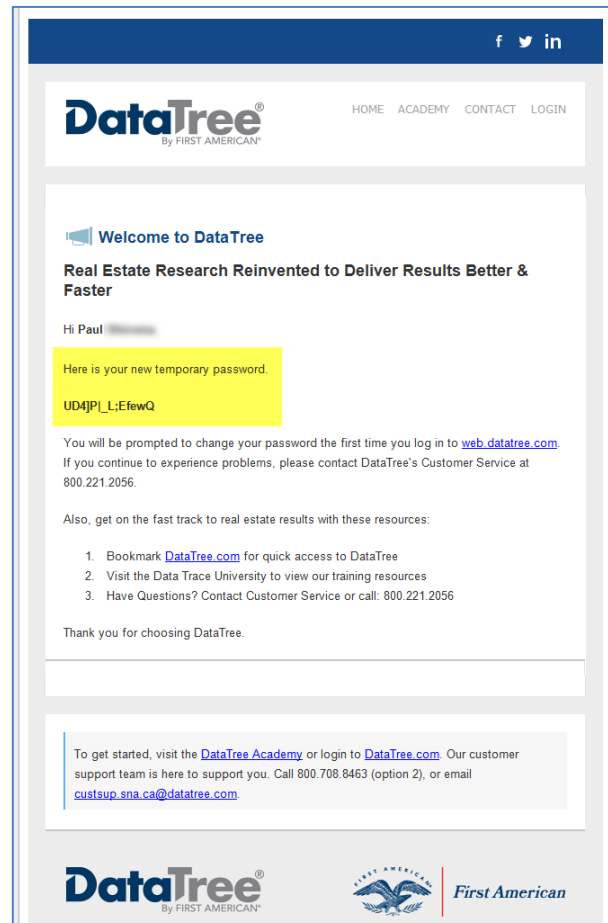

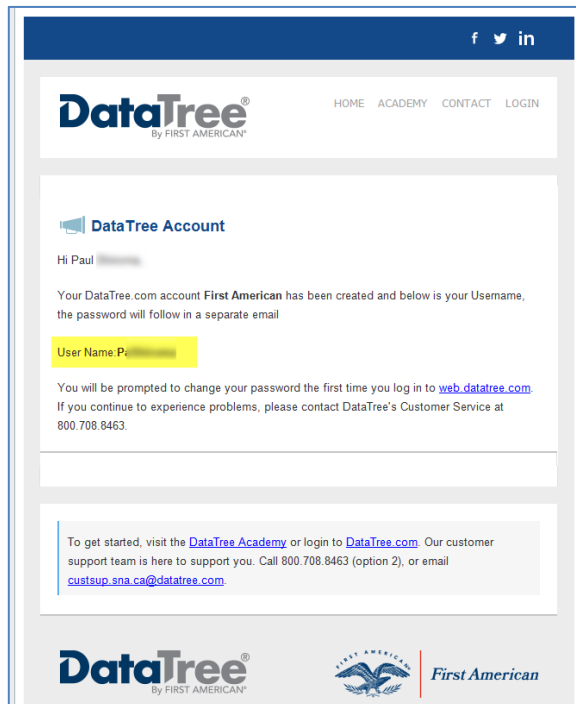

Total Documents is the number of documents ordered via Document ID (not via Property Search).

>>Expire in (days):	<input type="text" value="14"/>

Appendix: Managed Services Products

These products require an executed hard copy master licensing agreement. ELS provisions all managed services products accessed in DataTree and require a separate account in the ELS systems. Pricing is in the MLA and is not part of the DataTree Admin Tool.

Overview:

Provisioning Managed Services products

1. Salesforce Account Setup: Create a new Account Setup Request for the customer account.
2. DataTree Admin Tool: Create a new customer account or update an existing customer account in DataTree and provision the products on the customer contract.
3. Verify that the Managed Services approval process has completed and the products are available for your customer to order from DataTree.

Notes:

- Managed Services products are setup in parallel to setting up the customer in DataTree. You do not have to wait to complete the Managed Services contact to provision a customer in DataTree.
- Managed Services products will appear on the DataTree menu, but will not be fully available for ordering until the ELS team enters the customer's credentials in the Account Profile.
- If a customer uses the Managed Services products before ELS has completed their setup, they will receive the following message: "This product is currently in the approval and setup process. It will be available soon. Please try again later."

Step 1) Salesforce Account Setup Request

Complete an Account Setup Request for the ELS system. Make sure that you have the MLA and the Acct Setup - Non-Home Equity Client Management Summary form completed. Attach both documents to the Account Setup Request.

In Salesforce select the Account Set-up tab. Complete the required fields and select DataTree.com as the System Integration option.

The screenshot shows the 'New Account Set-up' form in the First American Salesforce system. The form is titled 'Account Set-up Edit' and includes a search bar at the top. The 'Account Summary' section contains several fields: 'Account', 'Opportunity Name', 'Service Agreement', 'BUID/Coast Center', 'User List Attached' (set to '-None--'), 'Billing Account Number', and 'System Integration(s)'. The 'System Integration(s)' field is a multi-select list with 'Available' options: 'AppraisalPort (FNC, Inc.)', 'APPRO/Loan Center (CRIF)', and 'DecisionPro (D+H)'. The 'Chosen' list contains 'DataTree.com'. A red arrow points from the text 'Account Setup Request for Flood, Appraisal, Valuation & Review products in DataTree.com' to the 'DataTree.com' entry in the 'Chosen' list.

Account Setup Request for
Flood, Appraisal, Valuation & Review
products in DataTree.com

Step 2) Existing Customers

In the DataTree Admin tool, select the Customer Service option and find the account.

Click Edit Pricing in the customer account. Enable the reports as specified in the customer's contract. The pricing details are in the Master Licensing Agreement.

Step 2) New Customers:

In DataTree Admin, select the Create Customer option and enter the appropriate account information. Provision all sections as required.
